PROGRAMME BLUEPRINT · CUSTOMISED MDP FOR ORGANISATIONS

Customised MDP Accelerator: 6-Week Diagnostic & Delivery Blueprint

A proposed customised Management Development Programme for middle managers and emerging business-unit leaders. The design starts from your capability gap, works a live business problem throughout, and ends with a defended execution plan and a 30-day impact review.

AUDIENCE	L&D and HR heads with business sponsors in GCCs, IT and services, manufacturing, BFSI and logistics
PARTICIPANTS	Middle managers and emerging business-unit leaders, in dedicated cohorts of 20-30
FORMAT	6-week blended; 4 intensive workshops on campus or at the client site, digital resources, simulations, coaching
INVESTMENT	Rs 70,000 per participant plus GST; minimum cohort of 20; repeat-engagement discounts to 15%

6-WEEK DIAGNOSTIC & DELIVERY BLUEPRINT

THE PROBLEM IT SOLVES

1. Why execution, not strategy, is the gap

Most organisations do not lack strategy. They lack managers who can convert strategy into consistent execution across functions. The pattern is familiar: priorities blur as they cascade, accountability is unclear between departments, and the same handoff failures repeat quarter after quarter.

Corporate buyers do not need another generic leadership course. They need an intervention connected to an actual organisational problem, with evidence they can defend internally. That is the spine of this design: participants leave with a tested execution plan for a real business problem, not just a completed course.

SELLING TWICE

An MDP purchase is a modified rebuy with a full buying centre: the line manager initiates, the cohort uses, L&D shapes and evaluates, the CHRO or business head decides, and procurement executes. A credible programme must solve the business unit's problem and give L&D defensible evidence of impact. This blueprint is built to do both.

ARCHITECTURE

2. The programme at a glance

ELEMENT	PROPOSED DESIGN
Programme	TAPMI Execution Leadership Accelerator, a customised action-learning MDP for middle managers
Buyer	Enterprise L&D / HR together with the sponsoring business unit
Participants	20-30 middle managers and emerging business-unit leaders per cohort
Duration	6 weeks, blended
Live component	4 intensive workshops, on campus or at the client site
Diagnostic	Pre-programme capability and business-problem diagnostic with agreed success metrics
Learning method	Case-based sessions, simulations, structured peer learning and coaching
Application	Each action-learning team works a live business problem supplied by the client
Final output	Execution Action Plan presented to faculty, L&D and the business sponsor
Post-programme	30-day follow-up and impact review against the agreed metrics

DELIVERY

3. The 6-week blueprint, stage by stage

0 Diagnose (pre-programme)

The client submits a business challenge. Participants complete a capability diagnostic and self-assessment; L&D and the business sponsor are interviewed; success metrics are agreed before the programme begins.

1 From Strategy to Execution

Why execution fails even when strategy is sound. Prioritisation, cascading accountability and decision rights.

2 Leading Through People

Delegation, high-stakes feedback, motivation, performance management and coaching.

3 Cross-Functional Execution

Stakeholder alignment, influence without authority, conflict and cross-silo process coordination.

4 Execution Under Uncertainty

Decisions under pressure and ambiguity, adaptive scenario planning and data-supported managerial judgement.

5 Action-learning project

Teams dissect and map the sponsor's live organisational problem, applying workshop tools between sessions.

6 Executive review

Teams present problem, diagnosis, proposed intervention, implementation roadmap and KPIs to faculty, L&D and the business sponsor.

+ 30-day impact review

Post-programme implementation tracking against the agreed business indicators, reported back to the sponsor.

HOW IT RUNS

4. The five delivery stages the client sees

STAGE	WHAT THE CLIENT DOES	WHAT THE PROGRAMME TEAM DOES
1. Diagnose	Submit business challenge; sponsor interview	Capability assessment; diagnostic report; problem framing
2. Co-design	Confirm objectives, cohort and success metrics	Customise curriculum, cases and simulations; customised programme plan
3. Deliver	Attend workshops; work the action-learning project	Faculty-led workshops, simulations, coaching; workbooks and cases
4. Apply	Implement the Execution Action Plan	Sponsor check-ins; progress dashboard; faculty mentoring of teams
5. Review	Present outcomes; join the 30-day impact review	Executive review; impact data collection; account review for repeat engagement

Visible evidence at every step: the diagnostic report, the customised programme plan, workbooks and cases, campus or client-site facilities, the LMS dashboard, the Execution Action Plan, certificates and the impact review document. L&D never has to take the programme's value on faith.

WORKED EXAMPLE

5. Illustrative project scenario

> **ILLUSTRATIVE PROJECT, NOT A REPORTED CLIENT RESULT**
>
> A cross-functional team maps delays in the sales-to-operations handoff, identifies ownership gaps between commercial and fulfilment teams, and proposes a revised handoff protocol with agreed service-level review measures.

This example shows how participants apply workshop tools to live friction. It does not represent an actual past institutional client or a guaranteed percentage improvement. The companion teaching case, The Cross-Functional Transition, develops this scenario in full for classroom discussion.

INVESTMENT

6. Cohort fees and framework terms (planning figures)

Rs 70,000 per participant plus applicable GST. Minimum cohort commitment: 20 participants.

COHORT SIZE	PER PARTICIPANT FEE	TOTAL COHORT INVESTMENT (BEFORE GST)	COHORT STRUCTURE
20 participants (minimum cohort)	Rs 70,000	Rs 14,00,000	4 action-learning teams of 5 managers
25 participants (standard cohort)	**Rs 70,000**	**Rs 17,50,000**	**5 action-learning teams of 5 managers**
30 participants (maximum cohort)	Rs 70,000	Rs 21,00,000	6 action-learning teams of 5 managers

Repeat engagement and multi-year framework

- 10% per-participant discount from the second cohort, or for 40+ participants committed within 12 months
- Discount capped at 15% from the third cohort, or 60+ participants
- Repeat discounts are not granted automatically to initial enquiries
- Proposed 2-3 year partnership framework: standard rate in year one, annual escalation capped at 5%, agreed scheduling windows and an annual co-design refresh

QUESTIONS

7. FAQs

For whom is this accelerator intended?

Middle managers, emerging business-unit leaders and team leads nominated by organisations facing execution bottlenecks.

Can individual professionals enrol on an open basis?

No. It is an organisational cohort intervention requiring a minimum cohort of 20 participants sponsored by an employer.

How is the curriculum customised?

Customisation starts in the diagnostic stage with a scoping call. Case examples, role-plays and the capstone project are drawn from the sponsoring client's industry and internal bottlenecks.

Does this guarantee business results or ROI?

No. The design includes agreed review metrics and a 30-day impact review, but no academic proposal can guarantee external financial results. What it guarantees is a structured attempt, measured honestly.

Is this currently available to book?

No. This is an academic concept developed for course evaluation, not an official corporate training offering.

> **STATUS OF THIS DOCUMENT**
>
> Prepared by a student project team for academic evaluation in the Business Marketing course at TAPMI Bengaluru. Programme designs, fees and services described here are proposals, not approved offerings, and no booking or payment is being accepted.
